

COPPER DELAY DETONATOR

TECHNICAL DATASHEET

Copper Delay detonator is made of copper shells filled with PETN as the base charge mixed with a primary charge. The shells are crimped with a pair of PVC coated wires and are fitted to an electric fuse head.

KEY BENEFITS

- Reliable means of delay initiation in underground coal mines, which provides required free face for successive rows of holes in solid blasting.

SAFETY

- Always keep the ends of wires shunted and open just prior to connections. Disconnect the firing cable from the exploder if circuit requires re-checking.
- Delay Detonators contain sensitive components and must be handled with care at all times. While using,
