

SEISMIC EMULSION EXPLOSIVE

SHIPPING NAME EXPLOSIVES		CLASS / DIV.: 1.1D			UN NO: 0241		
Authorised Name of Product	PESO Brand ID	Diameter	Weight	No of cartridge in a box	Nominal density	Velocity of detonation	Hydrostatic Head
		(mm)	(grams)		(gm/cc)	(mtr/second)	
Neo Gel - 90 CPT	915	50	500	50	1.2 ± 0.05	5,000	58
		50	1,000	25			
		63	500	50			
		63	1,000	25			
		76	1,000	25			
		76	2,500	10			

APPLICATION

- Seismic explosive used for seismic exploration operations.
- Product density is engineered to ensure the cartridge sinks in water, enabling effective placement in water-filled shot holes.

ADVANTAGES

- High-strength explosive with high velocity of detonation (VOD) and excellent water resistance.
- Supplied in couplable tubes for ease of handling and reliable field deployment.

HOW TO USE

- Initiation is carried out using a No. 8 strength seismic detonator.
- Maximum sleeping time is approximately 8 weeks, subject to site conditions.

PACKAGING

- Cartridges are packed in Plastic Tubes and further packed in 25 kg corrugated boxes.
